

# SARVESH BHANARKAR

## STUDENT/DEVELOPER

Nagpur | srbhanarkar05@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

### SUMMARY

Driven software developer with experience in full-stack development and hackathons, focused on creating real-world solutions. Skilled in rapid prototyping, building secure, responsive applications, and delivering polished products from concept to completion.

### PROFESSIONAL SKILLS

Mern Stack Development      Problem-Solving  
Database Management      Leadership

### TECHNICAL SKILLS

React.js and Next.js      Git & GitHub  
Node.js and Express.js      MongoDB

### PROFESSIONAL EXPERIENCE

**The CodeBreakers (TCB), RBU Nagpur – Core Member** 2024 – Present

- Collaborated with the development team to build and optimize web applications using React.js and Node.js, ensuring responsive and scalable solutions.
- Strengthened expertise in Data Structures & Algorithms, full-stack development, and Git/GitHub workflows.
- Worked with MongoDB for efficient data management and query optimization.

**Hackathon & Project Experience – Developer** 2024 – 2025

- Developed an AI-based tool with React.js and Node.js to generate concise text summaries.
- Designed and deployed personal and team-based projects, including a URL Shortener, Password Manager, and Portfolio Website, demonstrating full-stack development expertise

### PROJECTS

- Profile Locker** – Chrome extension built with React.js and JavaScript to secure Chrome profiles with password authentication and tab restrictions.
- AI Summarizer** – Web app that generates concise summaries of lengthy documents using AI, built with Node.js and React.js.
- Password Manager** – Secure application to store and manage credentials with encryption and responsive UI.
- Portfolio Website** – Personal portfolio showcasing projects, built with Next.js/React.js, Tailwind CSS, and smooth animations.

### EDUCATION

**Bachelor of Technology (B.Tech) – Electronics & Computer Science** Aug 2024 - May 2028  
Ramdeobaba University, Nagpur

- Skills Acquired - Data Structures & Algorithms, Web Development, Database Management, Software Engineering, Internet of Things (IoT), Digital Electronics, Computer Architecture, Embedded Systems

### ADDITIONAL INFORMATION

- Certifications:** Completed training in React.js and Node.js development, advanced Git & GitHub workflows, and workflow automation using n8n.
- Interests:** Creating real-world software solutions, participating in hackathons, contributing to open-source projects, and building applications with thoughtful UI/UX design.
